## PMNPro Services

### About the Program

PMNPro® is a regulatory risk screening and technical service program, primarily specializing in helping chemical companies navigate the new chemical review process at the Environmental Protection Agency (EPA).

Designed with maximum flexibility to meet the varying needs of the chemical industry, PMNPro has a wide array of customizable services available at below-market prices. SOCMA members can take advantage of additional discounts.

PMNPro® capitalizes on an effective working relationship with EPA's New Chemicals and Prenotice Branches to maximize regulatory certainty for companies introducing new chemicals into commerce.

### Flexible, Cost-Effective Service Packages

PMNPro® is designed to adapt to the dynamic needs of the chemical industry. PMNPro® not only focuses on chemical submissions in the U.S., it also assists with international new chemical notifications.

Under the PMNPro® consulting program, companies have access to any of the following services:

- Review of PMN
- Coordination of and participation in pre-notice consultation with EPA PMN review staff
- Review and analysis of potential exemptions
- Structure-activity analysis
- Searches for existing toxicity and chemical data
- Filing of PMN forms and other documents
- Hazard, exposure, and risk characterizations using EPA models
- Chemical testing strategy development and management
- Post-submission regulatory compliance strategy
- International new chemical notifications
- Additional custom services as requested

*“ We were losing revenue on a new product because it was stuck in the new chemicals process for over a year. PMNPro® identified the problem and secured approval for the product within a month. I highly recommend PMNPro®!”*

### Benefit of Using PMNPro®

PMNPro® offers a variety of service options from which to choose. In this way, PMNPro® provides as much or as little assistance as each company requires.

PMNPro® capitalizes on SOCMA's close and effective working relationship with EPA's New Chemicals and Prenotice Branches to maximize logistical and regulatory certainty. Using the same models and methods that EPA employs, PMNPro® experts are able to identify and address potential roadblocks before PMN submission.

Additionally, we can arrange and participate in an EPA prenotice consultation. This synergy with EPA, combined with our staff's decades of chemical industry experience, provides an efficient and cost-effective answer to any PMN related challenge.
